EDUCATION

Canisius University, Wehle School of Business Expected May 2028
B.S. in Finance & B.S. in Data Science, GPA: 3.74 Buffalo, NY
Awards: Dean's List (2024-2026), AKPsi Academy Fellow, NYPA Future Energy Leaders, MLK Scholarship, NSBE Scholar
Coursework: Data Structures, Algorithms, Large Scale Programming, Linear Algebra, Business Statistics, Financial Analysis

TECHNICAL SKILLS

Programming/Data: Python, Java, SQL, Excel, VBA, pandas, scikit-learn, FastAPI, Git, LaTeX, AWS, Boto3, REST APIs
Analytics/Visualization: Power BI, Tableau, KPI Reporting, Financial Modeling, Forecasting, Data Analysis
Risk/Operations: Operational Risk Assessment, Internal Controls, Process Optimization, Process Automation

EXPERIENCE

SPOC Analyst Intern June 2026 – Present
M&T Bank - Default Servicing and Single Point of Contact (SPOC) Buffalo, NY
Teaching Assistant Aug 2025 – Present
Canisius Wehle School of Business Buffalo, NY

- Lead weekly macroeconomics and microeconomics review sessions, supporting 50+ students through academic mentorship
- Facilitate economics workshops and exam preparation sessions, contributing to an 88% overall increase in exam averages

Risk Management Intern June 2025 – Aug 2025
Office of Mayor Christopher P. Scanlon, Division of Citizen Services Buffalo, NY

- Authored policy docs, training curricula, and procedures for Buffalo's Financial Empowerment Center for 20,000+ residents
- Streamlined housing code workflows via data analysis, cutting resolution time from 12 to 2 days in low-income areas
- Built Python regression models using U.S. Census data to forecast population growth across 8+ underserved city districts
- Produced demographic visualizations from Census regression models adopted in Buffalo city council planning initiatives

Student Leader Intern June 2024 – Aug 2024
Bank of America | Placement at Buffalo Prep Buffalo, NY

- Built Excel/VBA tracking systems for 70+ students, increasing attendance retention rates to 98% program-wide annually
- Conducted 13 leadership interviews assessing operational risk across student data management systems organization-wide
- Directed mentorship and progress tracking initiatives, enforcing compliance and student safety standards across programs
- Streamlined progress tracking workflows, strengthening internal reporting accuracy and operational accountability

Operations and Automation Intern Jun 2023 – Aug 2023
Northland Workforce Training Center Buffalo, NY

- Programmed Python and Java automation scripts for vehicle registration systems, reducing manual data entry by 40%
- Optimized vehicle service validation workflows through automated inspection tracking and maintenance scheduling processes
- Collaborated with 12 mechanics and 4 IT personnel, achieving 95% repair documentation accuracy benchmarks
- Improved fleet maintenance oversight through automated service request validation and operational tracking systems

PROJECTS

Advanced Financial Forecasting Model | *Excel, Python, VaR, Power BI*

- Automated occupancy-based revenue forecasting models, projecting long-term hospitality growth from \$150K to \$300K+
- Built dynamic five-year Excel projection models with seasonal demand drivers and scenario-based profitability forecasting
- Modeled variable cost structures and long-term P&L performance using 7% CAGR hospitality growth assumptions

Risk Monitoring & Alerts System | *Python, pandas, yfinance*

- Built real-time market risk monitoring systems using Python and yfinance to flag abnormal portfolio volatility conditions
- Engineered automated alerting and logging pipelines supporting continuous monitoring and audit-ready risk reporting
- Defined volatility thresholds and drawdown triggers to simulate institutional-grade risk controls across multi-asset scenarios

Banking Logging System | *Java, java.util.logging, IntelliJ IDEA*

- Designed Java banking simulations with structured logging controls and configurable runtime monitoring frameworks
- Implemented XML-based logging systems producing persistent audit-ready outputs for debugging and risk monitoring

Java Data Analyzer | *Java, JavaFX, JUnit 5, Gradle, File I/O*

- Built JavaFX desktop applications processing numeric datasets through single-pass statistical computation frameworks
- Implemented export handling, error logging, and JUnit 5 testing across layered Java application architecture systems

LEADERSHIP & ACTIVITIES

President | *Residence Hall Association* Dec 2024 – Present

- Direct Residence Hall Association operations through a 3-year presidential tenure overseeing \$20,000+ annual budgets
- Lead 40+ campus events, secured NEACURH and NACURH affiliations, and reduced vendor costs by 35% annually

Executive Vice President | *Alpha Kappa Psi, Delta Tau Chapter* April 2026 – Present

- Spearhead chapter operations and professional development initiatives for 15+ Alpha Kappa Psi fraternity brothers
- Direct officer coordination and managed \$7,000+ in chapter funding while upholding organizational excellence standards
